

**“Veseris Inventory
Manager saves us hundreds
on every order.”**

***Inventory Manager is now free
for Veseris customers***

As president of Miller Pest & Termite, **Joel Miller** needed help managing an inventory-related headache. His team was taking inventory with broken spreadsheets and notes scribbled on cardboard scraps, resulting in under- and overstocking across his three branches.

Then Joel put **Veseris Inventory Manager** to work. The digital platform allowed branch manager **Drew Glenn** to track technicians' individual product use, set automatic preorder levels, and anticipate the team's needs. “Now we know exactly what to order month to month,” Drew says. “It’s been an absolute gamechanger.”

By eliminating extra product costs, Veseris Inventory Manager immediately began saving the Miller team hundreds of dollars per month. Joel and Drew continue using the platform to spot training opportunities and keep their operations running smoothly. “With a bird’s-eye view of everything, Veseris Inventory Manager gives me peace of mind,” Joel says.
